

Rushikesh Shinde

SECOND-YEAR B.TECH COMPUTER ENGINEERING • STUDENT DEVELOPER

Pune, India • rushikeshshinde9637@gmail.com

PROFILE

Computer Engineering student focused on turning ideas into practical, usable software. Hands-on experience building a native Android community platform and a live web platform for a real client. Interested in mobile and web product development, cloud integration, location-aware experiences, and building software from concept through deployment.

SELECTED PROJECTS

Radius

NATIVE ANDROID APPLICATION • 2026

Localized Social Discovery

A location-based social platform designed to help people discover nearby people, activities, alerts and useful local information.

- Built around adjustable location discovery and map-based exploration.
- Implemented real-time community interaction, direct chat and localized help/information sharing.
- Includes time-bound “Pulses” for local activities, alerts and meetups.
- Uses Firebase authentication/data services and Google Maps-based location experiences.

Stack: Android Studio • Firebase Auth & Firestore • Google Maps API • Git/GitHub

Health Club Barshi

LIVE CLIENT WEB PROJECT • 2026

Community Health Platform

A live website developed for a real client in Barshi, created to support a free outdoor community exercise group through workout updates, galleries and event communication.

- Designed and built a responsive public-facing website for the client's actual web presence.
- Added a “Today's Workout” experience for coordinating current group activities.
- Integrated Cloudinary for managed media and gallery content.
- Deployed the production website through Netlify.

Stack: React • TypeScript • Cloudinary • Netlify • Git/GitHub

TECHNICAL & PRODUCT COMPETENCIES

Product Building Mobile applications • Responsive web experiences • UI/UX implementation	Backend & Cloud Firebase • Firestore • Authentication • Cloudinary • Deployment workflows
Development Tools Android Studio • Git/GitHub • Google Maps API • Netlify	Engineering Focus Location-aware systems • Real-time interaction • Media integration • Practical problem solving

EDUCATION

DY Patil College of Engineering and Innovation — B.Tech, Computer Engineering

Second Year • 2026–Present | First Year completed • 2025–2026

Building foundations in programming, problem solving, mathematics, computer engineering and practical software development.

CURRENT DIRECTION

Open to internships, junior development opportunities, collaborative engineering projects and opportunities to learn by building real software.

Portfolio: Rushikesh Shinde • Real projects, practical builds, continuous learning
